

China and Europe towards
Cooperation in Personalised Medicine

Save The Date:1st Sino-EU PerMed Science & Technology Webinar

Perspectives in Personalised Medicine: genomics, rare diseases, devices
13th September 2022, 8:00 – 13:00 CEST, 14:00 – 19:00 CST

Sino-EU PerMed is a project funded by the European Commission with the purpose to foster international coordination of research and innovation, funding and policies within the field of personalised medicine. The project is member of the family of projects under the umbrella of the International Consortium of Personalised Medicine (ICPerMed) which attempts to align and promote efforts in all areas of personalised medicine.

The Sino-EU PerMed project undertakes several activities to promote interactions between China and EU within the area of personalised medicine. A key part of the project is to exchange expertise and PM knowledge via science and technology webinars, thereby promoting cooperation and networking activities.

This first webinar will focus on various aspects of personalised medicine including genomics, rare diseases, and devices. Distinguished speakers from China and Europe will present their work and as conclusion the presenters will discuss how China and Europe can benefit and learn from each other to promote personalised medicine as a key component of tomorrow's health systems.

For more information on the event and speakers please visit the [Sino-EU PerMed Webpage](#).

The final agenda will be published soon.
